

# EXPLANATORY NOTES

## POLICY TITLE

**Grading System  
(4.600)**

## REASONS FOR CHANGE

In response to growing concern that parents and students are not adequately informed about the lottery scholarship and its eligibility requirements, the legislature adopted a bill that will implement a "lottery scholarship day." LEAs are required to conduct a lottery scholarship day for students in grades 8-11. The LEA may work in coordination with TSAC and the state department of education in providing scholarship information, as well as information on the necessity of passing Gateway tests for graduation from high school.

Each LEA will need to develop some procedures for following through with the requirements and details of the legislation.
